It’s threatening America’s security. The Pentagon and security leaders of both parties consider climate disruption to be a “threat multiplier” — it exacerbates existing problems by decreasing stability, increasing conflict, and incubating the socioeconomic conditions that foster terrorist recruitment. The State Department, the National Intelligence Council and the CIA all agree, and all are planning for future climate-based threats.

**America’s billion-dollar-a-day dependence on oil makes us vulnerable to unstable and unfriendly regimes.**

A substantial amount of that oil money ends up in the hands of terrorists. Consequently, our military is forced to operate in hostile territory, and our troops are attacked by terrorists funded by U.S. oil dollars, while rogue regimes profit off of our dependence. As long as the American public is beholden to global energy prices, we will be at the mercy of these rogue regimes. Taking control of our energy future means preventing future conflicts around the world and protecting Americans here at home.

It is time to secure America with clean energy. We can create millions of jobs in a clean energy economy while mitigating the effects of climate change across the globe. We call on Congress and the administration to enact strong, comprehensive climate and energy legislation to reduce carbon pollution and lead the world in clean energy technology.
