MET103 Homework Directions

Students will search for climate change-related news stories. The easiest way to do so is to use Google News Search. News articles must not be older than one year.

After reading the article several times, write a summary of the story in your own words. The best way to avoid plagiarism is to write your summary without looking at the news story.

Be sure to show how the story relates to topics discussed in class. Please carefully review:

Suggestions to Maximize HW Scores and MET103 Homework Outline links on my home page.

Please refer to the Homework Grading Rubric to maximize your score.

Students will submit THREE items all STAPLED and in the following order:

1. Double-spaced and typed summary of article with student name on top.
2. Printed or copy of original news article.
3. Homework Grading Rubric

Due: Beginning of class on date due. LATE HW WILL NOT BE ACCEPTED. Due dates are posted on the class bulletin board.

If you cannot attend that class, all homework items must be emailed to me before the due date/time. LATE HW WILL NOT BE ACCEPTED.
