CHOW'S TOP TEN LIST

Ten Commandments in Chow’s Math classes

10. Thou shalt not create your own math theory with no proofs.

9. Thou shalt not misuse definitions, axioms, and theorems.

8. Thou shalt apply common sense in giving your answers.

7. Thou shalt know the Pythagorean theorem and quadratic formula for life.

6. Thou shalt not give false testimony (wrong formulas) while doing problems on the test.

5. Thou shalt know thy order of operations, with parentheses as the highest order.

4. Thou shalt not integrate 1 over anything as natural log of everything.

3. Thou shalt not split fractions at thy own will.

2. Thou shalt read any word problems written in English as thy language, not as other languages.

1. Thou shalt not distribute anything over everything.
